

HOW TO DIAGNOSE OXIDATIVE STRESS?

FREE RADICAL ANALYTICAL SYSTEM

FRAS⁵

UPSTREAM
OF PATHOLOGY

**Evaluate the level of
the oxidative stress,
it is to be ahead of
onset of pathology!**

The body maintains a delicate balance between free radicals working to oxidize toxic compounds, and the antioxidant defense system. When this balance is upset, we enter in “**Oxidative Stress**” which causes the appearance of cellular lesions. If unchecked, Oxidative Stress can lead to accelerated aging, and to a greatly increased risk of disease.
